

Oracle Fusion HCM Standard Operating Procedure

Display Name Configuration & LDAP Synchronization Protocol

Document ID	SOP-HCM-NAME-2026	Target Platform	Oracle Fusion HCM Cloud
Category	Person Structure & Directory Sync	Profile Option Code	HR_LOCAL_OR_GLOBAL_NAME_FORMAT

Step 1: Navigate to Person Name Formats Configuration

1. Log in to **Oracle Fusion HCM Cloud** as an Administrator.
2. Open **Setup and Maintenance** from the Navigator menu.
3. Open the **Tasks** panel drawer on the right side and click **Search**.
4. Search for and select **Person Name Formats**.
5. Select the **Display Name** format type to modify its sequence and layout rules.

Step 2: Change Profile Value for HR_LOCAL_OR_GLOBAL_NAME_FORMAT

1. Navigate to **Setup and Maintenance > Tasks > Manage Administrator Profile Values**.
2. Search for the Profile Option Code: `HR_LOCAL_OR_GLOBAL_NAME_FORMAT`.
3. Under the **Profile Values** section, set the Site Level value to **American English**.
4. Click **Save and Close**.

Step 3: Update Local Display Names for Countries

1. Return to the **Person Name Formats** setup task.
2. Update all country-specific local display name formats to match the **Global** display name format layout, or configure them according to your specific organizational requirements.
3. Save your changes.

Step 4: Run Name Formats Compilation Process

1. Navigate to **Tools > Scheduled Processes**.
2. Click **Schedule New Process**.
3. Search for and run `Apply Name Formats to Person Names` to compile database tables with the updated display rules.

Step 5: Run or Schedule LDAP Synchronization

1. In **Scheduled Processes**, search for `Send Personal Data for Multiple Users to LDAP`.
2. Submit the process immediately, or click **Advanced/Schedule** to set a **Weekly** recurrence schedule for ongoing synchronization across enterprise systems.
